## **THE IMPORTANCE OF A WELL-DESIGNED LOGO**

You have one chance to make a first impression. Potential customers will form an opinion of a business within seconds. Your company's branding is therefore extremely influential, as the logo is almost always the first thing a customer will see. Your logo should be simple, recognizable, and effective at conveying the desired message to the public and should be consistent with your 'brand'. The logo's colors, style, size, shape, typeface, and overall design each play a part in the logo's overall design, and are all important components to consider when creating a custom logo. Branding is a vital part of a successful business, and much more influential than many people realize. By taking time to evaluate the different aspects of a logo, business owners can ensure that their company logo will have a much greater impact.
